

CHAPTER WEBSITE PLANNING PROCESS

Quinton Moore, Seward High School FCCLA

IDENTIFY CONCERNS: Seward's FCCLA Chapter does not have a website to communicate to our school and community about our chapter and our service.

SET A GOAL: Build a website to clearly show our community service, information about FCCLA, how to join in an attractive looking website to eventually put on our school district's website.

FORM A PLAN

WHO: Our school, community, and our members.

WHAT: A website that communicates information about our chapter.

WHERE: Our website can be accessed via our URL.

WHEN: Finish by the end of January to get it hosted by the deadline of February 1.

WHY: To tell our community about our FCCLA chapter.

HOW: Building it from HTML and CSS in Microsoft Visual Studio Code.

ACT: I made a schedule to work on this STAR project to be able to finish by the deadline. I had to research our FCCLA chapter history and get pictures from our community outreach.

FOLLOW UP: I am happy how this website came out, but I feel I could have been more efficient with a partner so we could split work. However, I am excited to tell our community about FCCLA and our chapter.
